

## Introducing . . . ?

Tonight your job is to tell me about yourself and how you feel about writing and reading. Describe your thoughts on the following:

- Important information about you.
- How you feel about writing and reading.
- Anything that's difficult for you about writing and/or reading.
- Things about the writing/reading you did last year that were successful for you or that you liked.
- Things about the writing/reading you did last year that weren't successful for you or that you didn't like.
- Goals you have for yourself this year.
- What you expect of me as your English teacher.
- Anything else you want to share with me.

You have three ways you to complete this task. You only need to choose one. It is due the next time class meets.

**Choice One:** A Wordle is a word cloud. The bigger the word is the more important it is to you. You can either create your Wordle by hand or using the Internet.

1. Go to [www.wordle.net/create](http://www.wordle.net/create)
2. Type in your words
3. If you want to make your words bigger, then all you have to do is type it again. The more you type the same word the bigger it will get.
4. If you have two words you need to keep together like Rhode Island, then you must use the tilde ~ between the words like this Rhode~Island. You can find the tilde key in the top left of the keyboard below the ESC key.

Choice Two: Write a friendly letter to me. Be sure to write it in the correct format. If you don't remember, try your best to use the format you think is correct.

Choice Three: Create an All-About-Me cube. Using card stock, construction paper or a sturdy piece of paper, create the shape below.

Step One: First thing that you do is you get a piece of paper. Take your ruler and measure out the design.

Step Two: Once you have this design cut out, you can continue making the cube. Take the three 1 inch sides and fold them at 90° angle, straight up. Now you have 3 sides bent up. Take some tape and wrap these sides up by taping each side end up. Once this is done you can move on to the finishing touch.

Step Three: Take the 2 inch long piece and bend it up until one inch of it is level with the top of the other 3 sides. Then bend that top piece down. Tape it all up and you should have a box. See photos for help.
